RUSSIA

WHY THE RUSSIAN MARKET IS A POTENTIAL FOR YOU?

DEMAND ACROSS INDUSTRIES

Retail, e-commerce, manufacturing, pharma, food processing — intralogistics automation is in demand everywhere, especially amid labor shortages.

PARTNERSHIP, NOT JUST EXPORT SALES

Russian companies are ready for deeper cooperation — local assembly, service centers and joint projects, not just one-off shipments.

ESTABLISHED SUPPLY ROUTES

Logistics routes into Russia continue to develop. Delivering large-scale equipment is now faster, cheaper and more predictable.

COMPETITIVE SOLUTIONS

Mature, mass-proven warehouse and robotics solutions at a lower entry cost — exactly what the Russian market needs today.
